

Projekt Citybanan

Oktober 2010, Tomtebodavägen

Cityline Project (Citybanan) undertaking preparatory track works for Mälardalen Line

Since June 2010 we have been carrying out track works for Stockholm's Cityline (Citybanan) in Tomtebodavägen district. Work is in progress at the same time to connect the Mälardalen Line with the City Line.

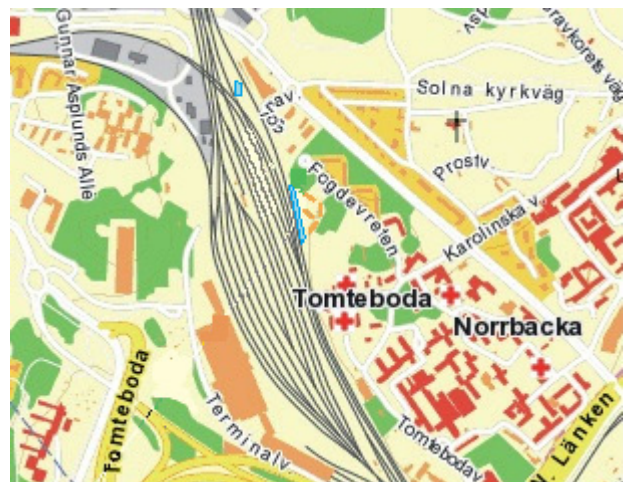

Landscaping adjacent to the track
During extension of the Mälardalen Line the track is being upgraded to allow for future connection to the Cityline.
Work will start in the summer of 2011 for construction of a retaining wall alongside the track.
This means that we must start now with blasting and removing part of the slopes below the properties at Fogdevreten.
We also need to fell trees and clear undergrowth.
Temporary protective fencing will be erected and when the works are complete the ground will be landscaped and grass will be planted adjacent to the retaining wall.

Ongoing blasting works
Excavation work is continuing and from Week 43 this may require two blasts per day, at 11.00 and 13.00. The work will be suspended from Week 50 to Week 1 in 2011. Work will resume again from Week 2 in 2011, with two blasts per day.

Rock crushing at Shurgård
Commencing week 44 the blasted and excavated rock is to be crushed within the track area, at the level of the Shurgård area.

Prior notification of blasting
Those residing or working within 150 metres from the

work area may register for our telephone notification service, which means that those wishing to have prior warning of blasting will receive a phone call with a recorded announcement that a blast is due to take place nearby in approximately 30 minutes. The calls will cease automatically when no further blasting is planned in the vicinity. Please call +46 8 762 40 40 if you would like to register for the service or have any queries concerning Cityline.

At the area in the middle marked blue part of the slope is to be blasted and excavated. Stone crushing will take place in the area marked to the north.

Yours sincerely,
Maria Westman
